**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are as follows: producing the selected notes (how are the notes being produced, selected, and fixed?).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coonce in view of Dinnan et al.

As the invention is best understood by the examiner, Coonce discloses a means for teaching music by selecting seven notes of a chromatic scale using a positioning device (60). Coonce does not specifically teach a method of teaching Eastern Music.

Dinnan et al discloses a method of teaching Eastern Music (see tables 1-3 and column 5, lines 22-55).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teaching method as disclosed by Coonce with the Eastern Music as taught by Dinnan to provide a means for defining specific notes from a desired musical scale.

5. Claim 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moberg in view of Dinnan et al.

As the invention is best understood by the examiner, Moberg discloses a means for teaching music by selecting notes of a chromatic scale thereby producing a melody (column 3, lines 1-10). Moberg does not specifically teach a method of teaching Eastern Music.

Dinnan et al discloses a method of teaching a Eastern Music (see tables 1-3 and column 5, lines 22-55).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teaching method as disclosed by Moberg with the Eastern Music as taught by Dinnan to provide structural understanding of music.

6. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new grounds of rejection.

The applicant's arguments with regards to the USC 112 rejection, the first page of arguments appear to be incomplete. While the examiner acknowledges the applicant further defining the terms "thata" and "raag" in the arguments, the method

steps must be specifically recited in the claims. A claim is indefinite when it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
